## Deploying Spring Boot 2.x Applications in WebLogic 12.1.3.1 (<https://blog.miyozinc.com/spring/deploying-spring-boot-2-x-applications-in-weblogic-12-1-3-1/>)

 December 16, 2018 (<https://blog.miyozinc.com/spring/deploying-spring-boot-2-x-applications-in-weblogic-12-1-3-1/>)  Anish Panthi (<https://blog.miyozinc.com/author/anish-panthi/>)  Spring (<https://blog.miyozinc.com/category/spring/>)

Deploying Spring Boot 2.x Applications in WebLogic Versions 12.2.x is simple then deploying those in WebLogic 12.1.x. I was struggling on the deployment of 2.x applications in 12.1.x version of WebLogic using Gradle. There is no issue if you use Maven. But, using gradle is complicated. But, finally, I got the solution and deployed successfully.

## Logging using Logback in Spring Boot Applications (<https://blog.miyozinc.com/spring/880/>)

 July 31, 2018 (<https://blog.miyozinc.com/spring/880/>)  Anish Panthi (<https://blog.miyozinc.com/author/anish-panthi/>)  Spring (<https://blog.miyozinc.com/category/spring/>)

Logging is mandatory for enterprise applications, which helps you to debug your application's output. We have lot of logging framework to use, in which, Logback is one of the famous and excellent logging framework for enterprise applications.

## Implementing Swagger2 in Spring Boot Application for API Documentation (<https://blog.miyozinc.com/spring/implementing-swagger2-in-spring-boot-application-for-api-documentation/>)

 July 17, 2018 (<https://blog.miyozinc.com/spring/implementing-swagger2-in-spring-boot-application-for-api-documentation/>)  Anish Panthi (<https://blog.miyozinc.com/author/anish-panthi/>)  Spring (<https://blog.miyozinc.com/category/spring/>)

Swagger2 is an open-source project used to describe, implement and document RESTful APIs. Swagger2 also helps developers to test their back-ends services.

# Creating Spring Boot Application for WebLogic and Tomcat (<https://blog.miyozinc.com/spring/creating-spring-boot-application-for-weblogic-and-tomcat/>)

📅 July 8, 2018 (<https://blog.miyozinc.com/spring/creating-spring-boot-application-for-weblogic-and-tomcat/>) 👤 Anish Panthi (<https://blog.miyozinc.com/author/anish-panthi/>) ➦ Spring (<https://blog.miyozinc.com/category/spring/>)

In this post, we are going to create our first Spring Boot Application. Since Tomcat is an embedded container that comes with Spring Boot application, it is easy to deploy in Tomcat container, but, today we will deploy our first Spring Boot Application in Oracle's WebLogic server.
